OUR APPROACH

We offer a unique French/English bilingual preschool and kindergarten for children with a foundation in Montessori values; **personalised education based on self-directed activity, hands-on learning, collaboration and community.**

Through a blend of **active pedagogies** (Reggio, Montessori, Freinet), we focus on a child-centred approach to learning, where the teacher acts as a facilitator and guide in the learning process, **supporting children** as they develop their confidence and **love of learning.**

At La Nouvelle École, we have blended the **French National Curriculum** and the **British Early Years Foundation Stage** to create a holistic programme across seven areas of learning. All objectives are taught in French and English by native speaking, qualified teachers.

OUR GOALS

- Offer stimulating learning experiences through exploration and creative play
- Encourage children's independence and perseverance through challenges
- Nourish children's nature desire to learn
- Adapt the learning to meet each child where they are in their development
- Develop children's self confidence and life skills

la nouvelle école

OUR PEDAGOGY

In the **Montessori approach** each child is considered **unique**, with their own needs, interests and skills. Therefore, the Montessori educational program is designed to allow each child to **progress at their own pace**, rather than forcing them to follow a uniform curriculum.

The organization of spaces allows children to move freely and choose their activities. Children are encouraged to explore and work with their environment.

The **Reggio Emilia approach** is an alternative educational approach that emphasizes **learning through play, discovery, creativity and collaboration**. By allowing children to engage in **meaningful learning experiences** we instill a love of learning and prepare children for the transition into school.

In both approaches - the **environment** is considered the **third educator**. The belief is that if children are placed in a beautiful environment, with stimulating materials to work with, they will be motivated to explore and respect the environment.
